100 BEST DEALS

78 Winter hack

Bagging yourself for winter hack means you don't have to subject your pride and joy to the vicious bite of the council's most corrosive grit. Buy cheap in October, sell in March (when just about anything sells) and enjoy the worst that the winter has to throw at you without fear, we promise you'll have a ball.

79 Good Cleaning kit

Get into a good cleaning regime and you'll be able to spend more time riding. Get a good bucket, preferably with a lid so you can store the kit inside, and a sponge, brush and toothbrush for the chain. Decent car shampoo will do the job and a small bottle of paraffin is good for shifting chain lube.

80 Bike Safe

Police riders have years of experience behind them and they're willing to share it with you for around £75. With Bike Safe you get an assessed ride and you'll be given advice on how to make your riding style more progressive, smooth, controlled and safe. It's not training, but it's well worth doing.

81 Earplugs

Do you know how much an ear trumpet will set you back? No? Neither do we, but what we can tell you is that earplugs are a damn sight less expensive. Joking apart, protecting your hearing from damage caused from wind and engine noise is essential, especially as a pack of EarSafe FX costs just 29p.
